

Atom Specimen Sheet

Every atom, rendered from the live code. The design system's periodic table.

Heading

Cabinet Grotesk 700, brand colour

Section Heading

size=lg, text colour

Body

Manrope, the default text

Regular body text for paragraphs.

Bold variant via the bold prop.

Small muted variant.

Mono

Geist Mono - ids, refs, numbers

PSI-001

AUD-VLNCY-2026-001

Label

uppercase micro-heading

FIELD DATA (REAL USERS)

SeverityBadge

finding severity pill, 5 levels

RatingDot

CWV rating dot, 4 states

ScoreCircle

progress-arc ring: score, grade, sizes

TintedBox

soft container surface

Card

bordered container, wrap=false

Banner

filled strip heading

Molecule Specimen Sheet

One repeatable unit each, built from atoms. Recipe shown beside the name.

MetricRow = RatingDot + Body + Mono

One metric line. Dot and value colour derive from the rating.

- Largest Contentful Paint (LCP)
- Total Blocking Time

2.2 s
480 ms

KeyValueRow = Body(bold) + Body

One label/value line. Fixed 90pt label column keeps rows aligned.

Device Emulated Moto G Power
Network Slow 4G throttling

ScoreItem = ScoreCircle + Body

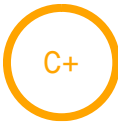

Numeric score circle + caption. Arc from score/max.

Performance

GradeItem = ScoreCircle + Body

Letter-grade sibling: full ring, colour via gradeColor.

On-Page SEO

FindingCard = Card + Mono + Heading + SeverityBadge + Body

One finding. wrap=false via Card: never splits across pages. Optional fields simply vanish.

SPEC-001

Example finding title

Specimen

Optional description line showing where longer context sits.

Impact: Est savings of 1,200 ms

Recommendation: The recommendation line, telling the reader what to do about it.

HIGH

Organism Specimen Sheet (1/2)

The JSON-facing blocks. Each maps one "type" string; each loops molecules over its items.

HeadingBlock = type: "heading"
Section heading with standard spacing.

Core Web Vitals Assessment

ParagraphBlock = type: "paragraph"
Body prose.

Field data from real users over the latest 28-day period. Overall assessment: Passed.

KeyValueBlock = type: "keyValue" = TintedBox + KeyValueRow[]
Label/value box.

Tool	Lighthouse 13.4.1
Device	Emulated Moto G Power

MetricsBlock = type: "metrics" = TintedBox + Label + MetricRow[]
Rated metric rows.

FIELD DATA (REAL USERS)	
LCP	2.2 s
TTFB	1 s

ScorecardBlock = type: "scorecard" = ScoreItem[]
Row of score circles.

TableBlock = type: "table"
Header row + zebra rows. Built from flexbox (no native tables in PDF).

ID	Item	Status
T-01	First row	OK
T-02	Second row (tinted)	Issues

Organism Specimen Sheet (2/2)

FindingsBlock = type: "findings" = FindingCard[]
Stack of finding cards.

SPEC-001

Example finding title

Specimen

Optional description line showing where longer context sits.

Impact: Est savings of 1,200 ms

Recommendation: The recommendation line, telling the reader what to do about it.

HIGH

Minimal card: title + severity only

LOW

SectionDividerBlock = type: "sectionDivider"
Chapter opener. In a real report this always starts a NEW PAGE (break); suppressed here so it fits the sheet.

01 PageSpeed Insights

Chapter description line sits under the rule.

AuditResultsBlock = type: "auditResults" = Banner + ScoreCircle + GradeItem[]
The results overview: banner, hero grade, sub-grade row.
