Website Audit Report

vlncy.com

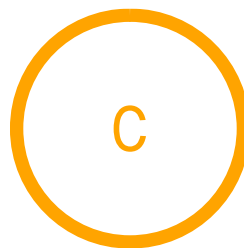

19 September 2026

Ref: AUD-VLNCY-2026-001

Executive Summary

This audit reviews vlncy.com across seven dimensions: Performance, Technical SEO, On-Page SEO, AI Readiness, Accessibility, Technology and Usability. The overall grade below summarises the findings; each section then details its evidence, and every failing check carries a concrete fix.

AUDIT RESULTS

This site needs attention in several areas.

Performance

Technical SEO

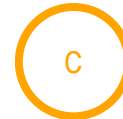

On-Page SEO

AI Readiness

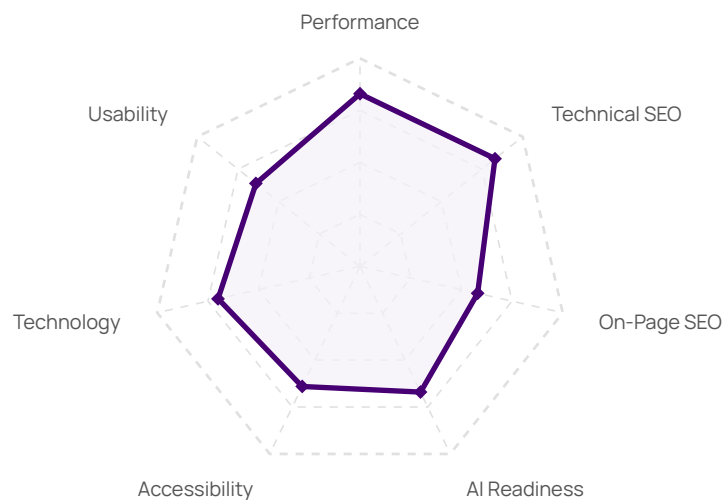

Accessibility

Technology

Usability

Findings by Severity

19 findings across the audit: 7 high severity, 12 medium. The most consequential first; every one is detailed, with its fix, in its own chapter.

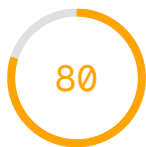

Severity	Finding	Where
High	Readability: Average Flesch score 39 (hard), 27 hard-to-read pages	On-Page SEO
High	llms.txt: No /llms.txt file found	AI Readiness
High	Structured data (Schema.org): No Schema.org markup detected	AI Readiness
High	Colour & Contrast: 1 of 2 rules failed, 5 elements	Accessibility
High	Elements must meet minimum color contrast ratio thresholds: 5 elements (serious)	Accessibility
High	Interactive controls must not be nested: 1 element (serious)	Accessibility
High	Off-site authority: 0.09 of 10, 0 referring domains (OpenPageRank, approximate)	Technology
Medium	Canonical tags: Missing on 36 pages	Technical SEO
Medium	Keyword alignment: 2 of 5 dominant terms appear in the title or H1	On-Page SEO
Medium	Keyboard: 2 of 5 rules failed, 12 elements	Accessibility

01 PageSpeed Insights

Google PageSpeed Insights results: real-user Core Web Vitals, Lighthouse lab metrics.
Tested 19 September 2026 on mobile and desktop.

Mobile Results

Field data from real users over the latest 28-day period (Chrome UX Report), mobile devices. Overall assessment: Passed.

Performance

Accessibility

Best Practices

SEO

FIELD DATA (REAL USERS, MOBILE)

● Largest Contentful Paint (LCP)	1.4 s
● Interaction to Next Paint (INP)	135 ms
● Cumulative Layout Shift (CLS)	0
● First Contentful Paint (FCP)	1.4 s
● Time to First Byte (TTFB)	0.6 s

Lab Metrics (Lighthouse, Mobile)

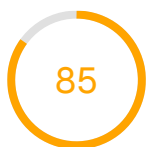

SINGLE PAGE SESSION, INITIAL LOAD

● First Contentful Paint	2.6 s
● Largest Contentful Paint	3.4 s
● Total Blocking Time	239 ms
● Cumulative Layout Shift	0.04
● Speed Index	4.5 s

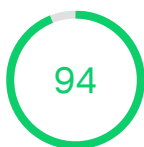

Test Conditions (Mobile)

Tool	Lighthouse 13.4.1, HeadlessChromium 151.0.7922.71
Device	Emulated Moto G Power
Network	Slow 4G throttling
Session	Single page session, initial page load
Field data	Latest 28-day period, Chrome UX Report

Desktop Results

Performance

Accessibility

Best Practices

SEO

Lab Metrics (Lighthouse, Desktop)

SINGLE PAGE SESSION, INITIAL LOAD

● First Contentful Paint	0.7 s
● Largest Contentful Paint	1.8 s
● Total Blocking Time	195 ms
● Cumulative Layout Shift	0.01
● Speed Index	1.4 s

Test Conditions (Desktop)

Tool	Lighthouse 13.4.1, HeadlessChromium 151.0.7922.71
Device	Emulated desktop
Network	Custom throttling
Session	Single page session, initial page load
Field data	Latest 28-day period, Chrome UX Report

02 Technical SEO

Crawlability, indexation, sitemaps, redirects and site health as seen by search engine bots.

Crawl Overview

A crawl of 37 pages found 1 check needing attention, detailed below.

Indexable (36 of 37 pages)

Health Checks

CRAWL & SITE HEALTH

● XML Sitemap	Present, valid
● Robots.txt	Present, valid
● HTTPS	Enforced site-wide
● Broken internal links	1 found

Indexability

1 page	Client Error
--------	--------------

Architecture & Assets

STRUCTURE, LINKING & IMAGES

● Parameterised URLs	4 URLs with query parameters
● Deep pages (4+ clicks from home)	None found
● Weakly linked pages (1 or fewer inlinks)	None found

Crawl Hygiene

Internal redirects

No redirected URLs in the crawl

Canonical tags

Missing on 36 pages

Add self-referencing canonical tags so duplicate URLs cannot compete with their own pages.

03 On-Page SEO

Titles, meta descriptions, heading structure and content depth across the crawled pages.

Content Checks

6 on-page checks need attention, detailed below.

TITLES, DESCRIPTIONS & HEADINGS

● Page titles	No issues found
● Duplicate titles	5 pages share a title
● Meta descriptions	No issues found
● Duplicate meta descriptions	5 pages share one
● H1 headings	Missing on 27 pages
● Multiple H1s	9 pages have more than one
● Thin content	No issues found
● Titles truncated in search	3 titles exceed Google's ~580px display width
● Descriptions truncated in search	8 descriptions exceed the ~990px display width

Keyword Focus

The words the homepage uses most, and whether each appears where search engines weigh it: the title, the meta description, and the main heading.

Term	Uses	Title	Meta	H1
vlncy	22	Yes	Yes	No
date	16	Yes	No	No
dating	12	No	No	No
app	12	No	No	No
truth	10	No	No	No

Keyword alignment

2 of 5 dominant terms appear in the title or H1

Work the missing dominant terms into the title and main heading, or rewrite the copy toward the terms the page should rank for; the page currently emphasises words its metadata ignores.

Content Quality

Readability

Average Flesch score 39 (hard), 27 hard-to-read pages

Shorter sentences and simpler wording lift comprehension for readers, and for the AI systems summarising the site.

Content freshness

Newest change 2026-08-27

04 AI Readiness

Whether AI systems, the crawlers behind ChatGPT, Claude, Perplexity and Google's AI features, can find, read and correctly interpret this site.

AI Visibility Checks

2 of 6 checks need attention. AI systems may be missing or misreading parts of this site.

E-E-A-T

Social Signals

Structured Data

llms.txt

No /llms.txt file found

Add an llms.txt file at the site root describing the site and its key pages for AI systems.

AI crawler access

GPTBot, ClaudeBot, PerplexityBot allowed

Structured data (Schema.org)

No Schema.org markup detected

Add Schema.org JSON-LD (Organization, WebSite, and page-type markup) so AI systems can interpret the site.

Meta robots

No accidental noindex blocking

Content without JavaScript

1269 words readable without JS

JavaScript dependence

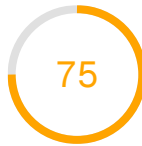

100% of rendered content survives without JavaScript

05 Accessibility

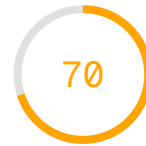

Whether every visitor, including those using assistive technology, can perceive and operate the site. Measured with axe-core, the open-source engine behind industry accessibility audits.

Accessibility Score

WCAG AA

Categories clean

Of 41 applicable checks, 4 failed, affecting 6 elements (serious), 17 elements (moderate).

Category Checks

Keyboard

2 of 5 rules failed, 12 elements

Semantics

1 of 9 rules failed, 6 elements

Colour & Contrast

1 of 2 rules failed, 5 elements

ARIA

All 10 rules passed

Structure

All 3 rules passed

Names & Labels

All 3 rules passed

Text Alternatives

All 4 rules passed

Parsing

All 1 rule passed

Language

All 2 rules passed

Sensory Cues

All 2 rules passed

Issues Found

Elements must meet minimum color contrast ratio thresholds

5 elements (serious)

Interactive controls must not be nested

1 element (serious)

All page content should be contained by landmarks

11 elements (moderate)

Heading levels should only increase by one

6 elements (moderate)

06 Technology

The stack the site runs on - platform, libraries and server - and whether the domain's email is protected against spoofing.

Stack & Server

Web server	Microsoft-IIS/10.0
IP address	104.211.97.138
Charset	utf-8
Detected technologies	Google Tag Manager, Google Analytics, jQuery, Bootstrap, Tailwind CSS, Google Fonts

Domain & History

Domain registered 2023-09-19 (3 years, 0 months ago)

Archive footprint Captured in 20 distinct months

 **Domain expiry** 2031-09-19, 1825 days away

 **Registrar transfer lock** Enabled, hijack-resistant

 **Off-site authority** 0.09 of 10, 0 referring domains (OpenPageRank, approximate)
Earn links from industry press, event listings and partner sites; off-site authority is the slowest lever and the one competitors are already pulling.

Email Security

1 of 2 email authentication checks need attention - the domain is not fully protected against spoofing.

 **SPF record** Present, senders authorised

 **DMARC record** Present but not enforcing (p=none)
Publish a _dmarc record with p=quarantine or p=reject to protect the domain from spoofing.

07 Usability

Whether visitors can accomplish what they came for without friction: page weight, mobile fit, search, forms, error recovery, measured directly, with room for expert evaluation alongside.

Measured Checks

Page weight

4.8 MB transferred on mobile

Compress and lazy-load media; every megabyte is seconds of waiting on a mobile connection.

Unsize images

11 images without width/height

Declare width and height so the layout cannot jump as images load.

Console errors

1 error logged at load

Fix logged errors; each one is behaviour some visitor is missing.

Mobile viewport fit

Content fits a phone screen

Site search

No search anywhere on the page

Offer search; visitors who cannot find what they came for leave.

Form labelling

2 of 2 inputs labelled

404 page

Does not say the page is missing, offers a way home (57 words)

A useful 404 admits the miss and offers routes onward: home, search, popular pages.

08 Priority Action Plan

Every failing check's fix, ordered by severity. Work top to bottom: the high-severity items move the grades and the visitor experience most.

#	Priority	Action	Evidence
1	High	Shorter sentences and simpler wording lift comprehension for readers, and for the AI systems summarising the site.	On-Page SEO: Readability (Average Flesch score 39 (hard), 27 hard-to-read pages)
2	High	Add an llms.txt file at the site root describing the site and its key pages for AI systems.	AI Readiness: llms.txt (No /llms.txt file found)
3	High	Add Schema.org JSON-LD (Organization, WebSite, and page-type markup) so AI systems can interpret the site.	AI Readiness: Structured data (Schema.org) (No Schema.org markup detected)
4	High	Earn links from industry press, event listings and partner sites; off-site authority is the slowest lever and the one competitors are already pulling.	Technology: Off-site authority (0.09 of 10, 0 referring domains (OpenPageRank, approximate))
5	Medium	Add self-referencing canonical tags so duplicate URLs cannot compete with their own pages.	Technical SEO: Canonical tags (Missing on 36 pages)
6	Medium	Work the missing dominant terms into the title and main heading, or rewrite the copy toward the terms the page should rank for; the page currently emphasises words its metadata ignores.	On-Page SEO: Keyword alignment (2 of 5 dominant terms appear in the title or H1)
7	Medium	Publish a _dmarc record with p=quarantine or p=reject to protect the domain from spoofing.	Technology: DMARC record (Present but not enforcing (p=none))

#	Priority	Action	Evidence
8	Medium	Compress and lazy-load media; every megabyte is seconds of waiting on a mobile connection.	Usability: Page weight (4.8 MB transferred on mobile)
9	Medium	Declare width and height so the layout cannot jump as images load.	Usability: Unsize images (11 images without width/height)
10	Medium	Fix logged errors; each one is behaviour some visitor is missing.	Usability: Console errors (1 error logged at load)
11	Medium	Offer search; visitors who cannot find what they came for leave.	Usability: Site search (No search anywhere on the page)
12	Medium	A useful 404 admits the miss and offers routes onward: home, search, popular pages.	Usability: 404 page (Does not say the page is missing, offers a way home (57 words))
